🌐 LinkedIn | 🐙 GitHub | [LeetCode](#) | [CodeChef](#)

OBJECTIVE

Computer Science undergraduate with hands-on experience building full-stack web applications using Python, Django, React, Java, and REST APIs. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and SQL. Passionate about backend development and eager to build scalable, clean, and efficient software while continuously learning modern technologies.

EDUCATION

ABES Engineering College, AKTU University

B.Tech, Computer Science and Engineering CGPA: 8.23

Sep 2023 – Present

Ghaziabad, India

St. Joseph's School, CBSE Board

Class XII – Science Stream (82.83%) Class X (87.33%)

June 2022

Siswa Bazar, India

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL

Frontend: ReactJS, HTML, CSS

Backend: Django, Django REST Framework, REST APIs, JWT Authentication

Database: PostgreSQL, MySQL

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Object Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks
- Software Engineering

PROJECTS

StudyRoom 🗒 | *ReactJS, Python, Django, WebSockets, PostgreSQL*

May 2026

- Developed a real-time collaborative co-working platform supporting multi-user sessions with live chat, shared task checklists, and synchronized timers.
- Designed RESTful APIs and WebSocket consumers enabling real-time communication between React frontend and Django backend.
- Implemented JWT authentication with custom Axios interceptors and silent token auto-refresh for secure persistent sessions.
- Deployed application on Render backed by a cloud-hosted PostgreSQL database.

AI Interview Simulator | *Python, Django, ReactJS, Hugging Face APIs, Streamlit*

Sep 2025

- Built a full-stack interview preparation platform integrating Hugging Face APIs for automated question generation and evaluation.
- Designed dynamic Q&A flow engine with real-time interaction using ReactJS frontend and Django REST backend.
- Built a performance tracking module logging session history, scoring user responses, and generating personalized feedback.
- Developed a Streamlit dashboard for rapid prototyping and visualizing model evaluation metrics.

Digital Laundry Management System 🗒 | *ReactJS, Django, PostgreSQL, REST APIs*

Oct 2024

- Developed full-stack workflow automation for hostel laundry management with REST APIs for order tracking and user management.
- Implemented role-based access control (student vs. admin) with a real-time dashboard to monitor active orders.
- Ensured data consistency through validated API inputs and structured PostgreSQL schema design.

ACHIEVEMENTS

- Secured Global Rank 3448 in TCS CodeVita Season 13 – global competitive programming contest (100,000+ participants).
- Solved 300+ Data Structures and Algorithms problems on LeetCode and CodeChef across arrays, trees, graphs, and DP.
- Participated in GUVI x HCL Hackathon – collaborated in a team to build and ship a working prototype in 24 hours.

CERTIFICATIONS

- Python Essentials 1 – Cisco Networking Academy
- Foundations in Generative AI – IBM SkillsBuild (Credly Badge)
- Introduction to Large Language Models – IBM SkillsBuild (Credly Badge)
